

## WAYPOINT SEALANTS PRODUCTS FOR ARTIFICIAL STONE/BOULDER FORMATIONS (WATERFALLS, SLIDES ETC)

CUTTING EDGE SEALANTS DESIGNED TO PROTECT, PRESERVE AND BEAUTIFY.

### ARTIFICIAL STONE

**Artificial stone** is made of a concrete mix that is molded and colored to simulate the color and texture of natural stone. The unique feature of the concrete mix used in making manufactured stone comes from the use of lightweight aggregates. One of the most obvious drawbacks to artificial stone is its durability – or lack thereof. Man-made stone is simply not as durable as the real thing. The light-weight concrete mixture can often break or chip. When this happens, it is usually quite noticeable. Artificial stone should be sealed to preserve the appearance/colors and prevent deterioration.

---

**Sealant Considerations:** Waypoint makes several sealers for protecting manmade concrete. The right sealer will depend on what is desired to be achieved. Most Waypoint sealants will provide protection from water while also providing special protection properties.

---

#### General Protection: From Weathering/Wear/UV Rays/Color fading/Salt-water erosion

**WPW350 - LOW SHEEN WET-LOOK:** Solvent based, acrylic surface film and penetrating sealer; repels water, oils, most stains, enhances colors.

**WPW250 - PAVER PERFECT HD:** Solvent based, acrylic surface film, high performance, darkens – enhances, gloss, wet look, repels water, oil, wine, etc., **Protection From Discoloring Algae/Molds, Black, Green, Other.**

**WPC200 - ALGAE REPEL HD:** Water based, surface film; repels water, prevents most forms/colors of algae, up to 2-3-year effectiveness.

#### You May Also Want to Consider for These Sealants for Preventing Deterioration and Strengthening.

**WPN800 - POROUS STONE PLUS WB:** Water base, penetrating, high performance, strong beading, strengthens substrates, may slightly darken/enhance, prevents salt-water erosion.

**WPC300 - CONSOLIDATOR PRO:** Solvent based, penetrating, repels water, consolidates and densifies, resists efflorescence, strong beading, slight darkening.

**WPS500 - DENSIFIER WB:** WPS500 greatly extends the life of concrete, decaying and deteriorating concrete and cast stone products; greatly reduces cracking, chipping, deterioration, **WPS600 - DENSIFIER PRO PLUS WB:** WPS600 waterproofs plus greatly extends the life of concrete, decaying and deteriorating concrete and cast stone products; greatly reduces cracking, chipping, deterioration, **\*\*For coating slides, also consider WPW250 – PAVER PERFECT HD.**
