

WAYPOINT SEALANTS PRODUCTS FOR BLUESTONE

CUTTING EDGE SEALANTS DESIGNED TO PROTECT, PRESERVE AND BEAUTIFY.

BLUESTONE

BLUESTONE: Bluestone is a colloquial or convenience label to stone with blue-gray shades of colors rather than a geological term or formation. In the USA, sandstone from Pennsylvania and New York, and Limestone from the Shenandoah Valley are Bluestones. Bluestone is a sandstone and often used as flagstone and has medium porosity and should be sealed.

Sealant Considerations: Waypoint makes many sealers for protecting bluestone. Some sealers are the water-base versions (for VOC restrictive states) of solvent-based sealers. The right sealer will depend on what is desired to be achieved. Waypoint sealants for bluestone will provide protection from water while also providing unique, special protection properties. Bluestone is prone to darkening when sealed. Always test a small area for color acceptability before sealing the entire project.

General Protection: From Weathering/Wear/Flaking/UV Rays/Salt-water erosion

WPN200-Natural Seal Plus, water-based, penetrating; repels water, prevents efflorescence, strong beading, natural look although may very slightly darken some stone.

WPN800-Porous Stone Plus WB, water-base, penetrating, high performance, strong beading, strengthens substrates, may slightly darken/enhance, prevents salt-water erosion and efflorescence.

WPR100-Stone Shield Pro; solvent-based, penetrating, repels water, prevents salt-water erosion, strong beading, may slightly darken.

WPN250-Natural Seal Plus WB, water-based, film forming and penetrating, repels water, repels stains, prevents efflorescence, high dirt/leaf/grass resistance and pickup, matte finish, does not affect color.

Protection from Stains

WPN900-Stain Tuff Sealer WB, water-based, penetrating; repels water and oil (motor/cooking), nature stains caused by oils, strong beading, slight darkening.

WPR600-Stain Guard Plus, solvent-based, penetrating, repels water, strong stain resistance including red wine, oils, strong beading, slight darkening.

You may also consider...

WPW350-Low Sheen Wet-Look, solvent-based, acrylic surface film and penetrating sealer; repels water, oils and most stains, enhances/darkens colors giving a wet look, **Sealants that Enhance and Bring Out Colors**

WPR800-Ultra Enhancer WB, matte finish, water-based, penetrating; repels water, strong beading, enhances colors, wetlook, slight to moderate darkening, prevents efflorescence.

WPW350-Low Sheen Wet-Look, solvent-based, acrylic, surface film and penetrating sealer; repels water, oils and most stains, enhances/darkens colors giving a wet look.

Other Protection Considerations

Algae/Mold Growth: WPC200-Algae Repel HD, water-based, surface film; repels water, prevents most forms/colors of algae, up to 2–3-year effectiveness.

Existing Deterioration/Salt-Water Erosion: WPC300-Consolidator Pro, WPC300 is a solvent based, deep penetrating high performance sealer that extends the life of concrete, decaying and deteriorating concrete and cast stone products; greatly reduces cracking, chipping, deterioration, repels water, consolidates and densifies, resists efflorescence, strong beading, slight darkening.

Anti-Slip Grip, an option for acrylic products, **WPS100-Anti Slip Grip Granules**, textured, polypropylene particles added to film forming sealants (WPW350) that reduce slippage especially when surfaces are wet.
